DETAILED ACTION

1. Information Disclosure Statement filed on 8/13/01 has been received. Priority Papers filed on 8/13/01 have been received. Change of address filed on 3/25/02 has been received.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 20 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 20 discloses the operating force is kept constant when the operating force is increased or decreased. It is unclear to the examiner as to the what is meant.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1,9-16,18-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Walenty et al (U. S. Patent no. 5,139,315).

Walenty discloses a parking brake system that controls the brake force based on the slip of the wheels, see abstract. Figure 1 Drive power source 16 (motor), controller 18

Regarding claims 10-16, the claimed limitations are all standard control processes for ABS.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 2-8 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Walenty in view of Matsuo et al (U. S. Patent no. 4,629,043).

Walenty is relied upon as above. Walenty does not disclose commonly controlling the wheels using a mechanical system with a transfer device and a equalizer. Matsuo et al teaches commonly controlling the wheels using a mechanical system with a transfer device and a equalizer (see figure 1). It would have been obvious to one of ordinary skill in the art at the time the invention was made to commonly control the wheels using a mechanical system with a transfer device and a equalizer as taught by Matsuo et al in the system of Walenty in order to reduce costs. The cable device in Matsuo is cheaper to utilize than the separate motors of Walenty. Furthermore, the use of a cable device is common for parking brakes in vehicles and therefore industry standard parts may be used.
